

Ad-driven Distribution Compliance Guidelines

PA Media has partnered with iCrowdNewswire (iCN) to offer a new way of distributing your press release outside of the traditional channels to boost your reach. In order to include your ad on Google, Facebook, LinkedIn, and Instagram, all Ad-driven Distribution orders must adhere to the compliance guidelines.

As part of iCN's compliance check, the press release content and landing page (link destination, including your organisation's website) will be reviewed for words that may be flagged by the ad platforms. Please allow a minimum of 12 hours for compliance checks to be completed.

In the case where there are words related to the non-compliant topics and categories, the press release and/or landing page would have to be changed to ensure the ad campaigns can run safely.

It is important to note that the ad platforms also consider the context and the taste of the content to make their assessments, so in a scenario where a word like "political" is mentioned in a financial-related release, that would not be a problem.

In the case where a major proportion of the press release is about a topic or category that is non-compliant, iCN may reject the order.

Non-compliant Topics & Categories:

Please note that words relating to or belonging to these topics and categories are also to be considered.
